

2009 Private Applicator Training Schedule

The private applicator initial certification and recertification training sessions are finished for 2009.

New training sessions will start in January 2010 for those who need initial pesticide licenses or need to recertify by April 15, 2010.

If you wish to obtain a license or recertify in 2009, you will need to visit your county Extension office to obtain a Nebraska Private Self-study Manual.
